Professional Summary

Backend and Full-Stack Engineer with production experience in distributed systems, AI-integrated applications, and cloud-native microservices. Designs and delivers scalable REST APIs, RAG pipelines, and real-time systems using Node.js, React, and Next.js — with end-to-end ownership across schema design, LLM orchestration, vector search, Kubernetes deployments, and CI/CD automation.

Experience

iPROTECHS Commercial Solutions Pvt. Ltd.

Hyderabad, India

Junior Software Engineer — Node.js

Jun 2026 – Present

- Engineered production-grade RESTful APIs with layered request validation, centralized error-handling middleware, and modular service architecture, enabling scalable backend operations across multiple business domains.
- Designed MongoDB schemas and Mongoose data models with normalized entity relationships, enforcing integrity constraints and optimizing compound indexes for high-read query workloads.
- Integrated third-party REST APIs with OAuth-based authentication flow handling, response normalization, and resilient retry-with-backoff error recovery for fault-tolerant upstream communication.
- Drove code review cycles within agile sprint workflows, expanding Jest-based test coverage and systematically reducing technical debt across the shared Node.js codebase.

Technical Skills

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Tailwind CSS, Redux Toolkit, React Hook Form

Backend: Node.js, Express.js, REST API Design, Socket.IO, Server-Sent Events (SSE)

Databases: MongoDB, Mongoose, Pinecone (Vector DB), Redis

Authentication: JWT, OAuth 2.0, Role-Based Access Control (RBAC)

AI / LLM: RAG Pipeline Design, LangChain, Mistral AI, Google Gemini, Vector Embeddings, Semantic Search

Cloud / DevOps: Docker, Kubernetes, GitHub Actions, CI/CD Pipelines, Nginx, Vercel, Render, MongoDB Atlas, Cloudinary

System Design: Microservices Architecture, Caching Strategies, Rate Limiting, Load Balancing

Tools: Git, Postman, Jest, D3.js, Razorpay, GitHub Codespaces

Projects

Cloud IDE | *Kubernetes-Based Cloud Development Environment* | GitHub

- React, Node.js, Docker, Kubernetes, LangChain, Mistral AI, Socket.IO, Nginx, MongoDB*
- Architected a microservices system of four independently deployable services — authentication, AI assistant, request router, and sandbox orchestrator — each with dedicated Kubernetes manifests.
- Engineered dynamic Kubernetes pod provisioning to spin up isolated React/Vite sandbox containers per user session, with automated namespace-scoped resource cleanup on session termination.
- Integrated LangChain and Mistral AI for context-aware AI-assisted code editing, streamed in real time via Server-Sent Events (SSE), eliminating polling overhead and reducing perceived latency.

DataNest AI | *AI-Powered Document Intelligence Platform* | Live

- React, Node.js, MongoDB, Pinecone, Redis, Mistral AI, Google Gemini, D3.js*
- Designed a full RAG pipeline — document ingestion, adaptive chunking, vector embedding generation, and semantically ranked retrieval — producing grounded, hallucination-resistant LLM responses.
- Integrated Pinecone for high-dimensional ANN search and architected dual-LLM inference support with Mistral AI and Google Gemini as interchangeable backends for fault tolerance.
- Implemented Redis query-result caching with per-user rate limiting, reducing redundant LLM API calls; surfaced usage analytics via interactive D3.js dashboards.

Doramon AI | *Scalable RAG-Based Multi-User Chat Platform* | Live

- React, Node.js, Express.js, MongoDB, Pinecone, Redis, Socket.IO*
- Implemented a vector-based RAG pipeline using Pinecone for semantic chunk retrieval, producing grounded, document-faithful LLM responses with citation traceability.
- Engineered real-time multi-user chat over Socket.IO with room-scoped session management, enabling concurrent independent document-grounded conversations.

Education

Chaitanya Deemed to be University

Hyderabad, India

Bachelor of Computer Applications (BCA)

2023 – 2026

Certifications & Achievements

Full Stack MERN Development — Sheryians Coding School

Sheryians Cohort Hackathon 2026 — Participant, Team Codeblooded
